

## ABSTRACT

This invention relates to a combined preparation for simultaneous, separate, or sequential administration in the treatment of cancer, comprising two separate preparations:

\* a preparation comprising, in combination with a pharmaceutically acceptable carrier or diluent, at least one compound of general formula I:

wherein

R<sup>1</sup> and R<sup>2</sup> each independently represent a hydrogen atom, lower alkyl, or the like, and G represents pentosyle or the like, X<sup>1</sup> and X<sup>2</sup> each independently represent a hydrogen atom, a halogen atom, or the like or a pharmaceutically acceptable salt thereof; and

\* a preparation, in combination with a pharmaceutically acceptable carrier or diluent, such as antitumor alkylating agents, antitumor antimetabolites, antitumor antibiotics, or plant-derived antitumor agents (a preparation comprising at least one compound of general formula I or a pharmaceutically acceptable salt thereof may be

combined with two or more other antitumor agents), and a method for cancer treatment comprising the administration of these preparations in combination.
